AMERICAN CONCRETE INSTITUTE

VOLUME 43—1947

From JOURNAL OF THE AMERICAN CONCRETE INSTITUTE, Vol. 18 Sept. 1946, to June 1947 and Part 2, December 1947

Original contributions to the JOURNAL OF THE AMERICAN CONCRETE INSTITUTE—papers, reports and discussions—are indexed in three categories;

1. Title ..... **Contraction joint grouting of large dams** (**43**-21) A. Warren Simonds Feb. 1947.... 673

2. Author ..... **Abeles, Paul William**—Disc. Analysis and design of elementary prestressed concrete members (**43**-4) June 1947..... 88–1

3. Subject ..... **Dust prevention methods**—Floor tests (**43**-9) Oct. 1946..... 181

Numbers in parentheses with each entry constitute the title number of the article. The bold face portion indicates the number of the *Proceedings* volume (in this case 43) in which the topic appears. The month and year indicate the JOURNAL issue. Page numbers of both *Proceedings* and JOURNAL are the same.

Job Problems and Practice items include "JPP" in the parentheses:

Construction — Frame vs. wall bearing (**JPP 43**-181) Jan. 1947..... 606

again the bold face number is the *Proceedings* volume number.

The index to Current Reviews published in this volume begins on p. 1169.
